WORK EXPERIENCE

Procurement Manager

Delattre Levivier, *specialized in industrial projects construction*

01/2017 - 12/2020

- Realized cost-avoidance of 27% of Total Cost of Ownership by coordinating design-to-cost of Capital expenditure equipment, formulating required performance in the statement of work, and by leading bidding and contract negotiations.
- Developed and maintained relationships and smooth communication with key suppliers to meet required expectations, conduct assessments, mitigate risks, and resolve conflicts.
- Reduced average purchasing lead time by 15% through expediting deliveries, eliminating bottlenecks, reviewing buying process, and improving upstream and downstream collaboration.
- Enhanced procurement maturity and efficiency by adjusting procedures and implementing buying categories for raw materials, equipment, services, and indirect purchases.

Procurement and Inventory Manager

Maghreb Steel, *steel producer*

01/2015 – 10/2015

- Sourced new vendors and improved existing suppliers' management, generated over 13% of purchasing savings by selecting and contracting cost-effective partners based on their competitiveness in quality, price, delivery, and customer service level.
- Professionally managed inventory through setting replenishment target levels and safety stock, monitoring turnover ratio, and implementing stock cycle counting, and as a result satisfied 95% of S&OP and MPS requirements.
- Generated monthly, quarterly, and yearly reports monitoring relevant KPIs on purchasing operations, and completed annual budget forecasting.

Project Purchasing and Logistics Manager

Buzzichelli, *specialized in industrial projects construction*

05/2012 – 12/2014

- Efficiently multitasked purchasing deliverables as requests for proposal/information/quotation, purchase orders, and contracts for simultaneously ongoing turnkey projects while ensuring the interface between internal and external stakeholders and solving supply chain problems involving numerous Opex and Capex purchases, and budget constraints.
- Secured inbound and outbound logistic operations for major EPCC projects by negotiating triangular multi-modal transportation contracts for the whole scope of equipment and materials.
- Streamlined SAP implementation as MM functional key-user by collecting and analyzing business data for system migration, conducting tests, delivering training before Go-live, customizing relevant reports, and sharing best practices.
