PROJECTS

Escort Girl Project

2 months

Objective: A website developed in 2 months to help Escort girls advertise their services and make money.

Result: The website hit & achieved more than 300+ users presently.

KiPART

3 months

Objective: A Web and Mobile application developed to book travel tickets.

The mobile application is a client consuming resources via a REST API

Develop with Android Java, Android Studio, REST, API

Result: Apps built successfully and delivered to customers within the deadlines

Tracking App**1 month**

Objective: MTA sends packages around the world. This application allows one to know where a package is located at a given time. The user simply enters the parcel number and sees all associated routes.

The mobile application is a client consuming resources via a REST API

Develop with Android Java, Android Studio, REST, API

Result: Apps built & delivered successfully with over 100+ downloads on the Google Play Store.
