PROFILE SYNOPSIS

A highly skilled and motivated Business Intelligence Analyst with a strong background in data analysis, financial operations, and environmental projects. Over 15 years of experience in the financial sector, with expertise in financial reporting, data visualization, and regulatory compliance. Exceptional analytical, problem-solving, and decision-making abilities, with a collaborative and goal-oriented approach. Fluent in French and English, with excellent communication and organizational skills.

Skills

- *Data Analysis and Financial Reporting: Conducted financial analyses and prepared regulatory reports, ensuring compliance with industry standards. Leveraged Power BI and Python to analyze complex data sets, providing actionable insights to drive business strategy.*
 - *Project Management and Environmental Analysis: Directed field surveys and feasibility studies for environmental projects, collaborating with local associations and international programs to promote environmental awareness.*
 - *Technical Proficiency: Expertise in data analysis tools and techniques, including SQL, Power BI, Python, and Databricks. Demonstrated ability to work collaboratively in diverse teams, adapting to changing project requirements and maintaining a goal-oriented approach.*
 - *Analytic and Goal-Oriented: Strong analytical skills with a focus on achieving measurable results.*
 - *Collaborative: Effective team player, skilled in fostering a collaborative work environment.*
 - *Patient and Flexible: Ability to adapt to changing circumstances with patience and flexibility.*
-

Professional Experience

Finance and credit administrator | Association for the Development of MJ Oct2009 – Apr2024

Conducted comprehensive financial analyses and data entry to support operations, managing an annual budget of 500 million DT with an average of 200 clients per year.

Performed meticulous bookkeeping and record-keeping, overseeing total receivables of 1000 million DT with an impressive recovery rate of over 87%.

Assisted in budget planning and actively monitored financial activity inquiries to ensure accuracy and alignment with financial goals.

Identified discrepancies and implemented corrective actions, leading to a notable 3-point increase in the recovery rate post-COVID-19 recession by leveraging in-depth data analysis and client-specific insights.

Utilized advanced data analysis techniques to refine collection policies, targeting clients based on sector, region, and age demographics, resulting in significant improvements in PAR30, PAR60, and PAR90 ratios.

Prepared and delivered detailed financial reports, analyzing data with 15 columns and over 25,000 rows, including credit amortization schedules and client data to inform strategic decisions.

Managed and maintained credit and financial records with a focus on accuracy and operational efficiency.
